

Combatting poverty and malnutrition in Burundi

March 2016 progress report from the Diocese of Musinga, Burundi

The diocese gratefully reports that, with the initial installment of money received, they have:

- trained 90 community leaders from three communities (30 from each) in modern farming techniques and how to form cooperatives. These trained leaders are now expected to, in turn, train 900 farmers in their communities.
- Purchase and distribute more than 6600 kg of various vegetable seeds
- Purchase farming tools to be given to the farmers associations.
